 - Conclusion
- 

Introduction

What is Career Predict AI?

A decorative header featuring a row of hexagons in various shades of blue, orange, and white. Below this row, a second row of hexagons is partially visible, including a prominent orange one and a dark blue one.

Career Predict AI

- Career Predict AI is a system that predicts the company based on the user given data.
- It analyzes the student's academic and technical skills.
- Built using Python, Flask, and Scikit-learn.
- Provides quick and accurate placement predictions.

Why Career Predict AI?

Problem statement

Problem Statement

- Student are confused about their placement opportunities.
- Manual career guidance is time killing process.
- There is nothing like to estimate placement chances.
- A predictive system helps students to prepare better

Objective

- To build an AI system which is help student to understand the company requirements and to improve the skills.

Technologies Used

- Python
- Flask
- Pandas
- NumPy
- Scikit-learn
- Joblib
- HTML
- CSS

System Architecture

Input Dataset

- Branch
- CGPA
- Python
- Java
- SQL
- Projects
- Internship
- Certifications

Target:

- company

Machine Learning Model Random Forest Classifier

Steps

- Load Dataset
- Data Preprocessing
- Label Encoding
- Train-Test Split
- Model Training
- Save model

 **Placement Readiness Score: 57/100**

Based on your academic profile and skills.

 **Suggestions to Improve**

Prediction Result

Advantages & Future Enhancements

Advantages

- Easy to use
- Helpful for students
- Fast prediction
- Useful for preparation
- User-friendly interface

Future Enhancements

- Increase dataset size
- Add more companies
- Improve prediction accuracy
- Resume analysis

Conclusion

Career Predict AI successfully predicts placement companies using Machine Learning. The system provides quick, simple, and efficient predictions, helping students understand their placement opportunities and prepare effectively.

A decorative graphic on the left side of the slide, consisting of a cluster of hexagons in various shades of blue, orange, and white, arranged in a honeycomb-like pattern.

Thank you
